

# Secure, Scalable Backup to Microsoft Azure Storage

## Why CrashPlan?

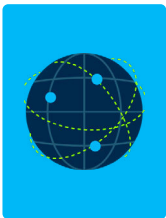

CrashPlan's Azure-Centric SaaS solutions for endpoints, Microsoft 365, and servers empower organizations with enterprise-grade cyber-resiliency and data protection capabilities.

Using Microsoft Azure as our SaaS host, CrashPlan ensures scalable, low-cost, secure data storage with e-discovery/search enabled administrator and self-service restores.

## Integrated Azure Benefits

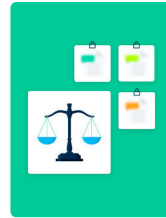

CrashPlan's "Zero-Storage-Cost" patented technology backs up to Microsoft OneDrive and Azure blob storage, leveraging Microsoft's world-class security, scalability, and hybrid support. Microsoft's ongoing multi-billion-dollar security investments and trusted global reputation are foundational to our partnership and ensure continued innovation and reliable data resiliency.

## Core Features

### Advanced Data Security

AES-256 encryption and TLS 1.2 transmission protocols protect data both at rest and in transit, with strong segregation-of-duty measures.

### Immutable Storage & E-discovery

Data may be stored immutably, and CrashPlan offers robust indexing for legal and compliance searches. Enable legal hold directly in the CrashPlan console to retain critical data until release.

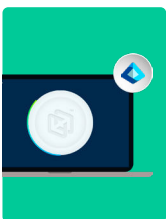

### Policy-Based Management & Centralized Control

Admins can tailor backup policies and oversee enterprise-wide activities through a unified console, ensuring data integrity and compliance.

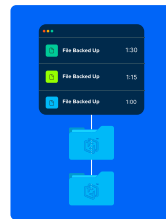

### Cost-Effective Flexibility

You can utilize your own storage targets (including Azure, OneDrive, or virtually any other target) to reduce total cost of ownership. Or leverage CrashPlan's Azure storage for a turnkey solution.

### Microsoft Entra ID Integration

CrashPlan for Microsoft 365 integrates with Microsoft Entra ID (formerly Azure Active Directory), for seamless access management and sign-in for all your users.

### Incremental Backup Efficiency with Global Deduplication

After the initial data upload, only new and modified data are backed up to optimize storage and network resources.

## Comprehensive Security & Threat Prevention

CrashPlan's multi-layered "Air Gap" security approach includes rapid recovery features to mitigate ransomware threats, zero-knowledge privacy principles, and regulatory compliance with standards such as HIPAA, GDPR, SOX, and more. Built-in audit trails offer tangible compliance evidence, while hybrid deployments (Bespoke BaaS) provide seamless transitions between on-premises and cloud solutions.

## Simplified Management & Global Scalability

CrashPlan provides a single-pane management interface, empowering businesses to scale across global locations with built-in redundancy, failover, and data sovereignty controls where needed. Our secure web-based interface ensures data can be safely recovered to any device.

## The CrashPlan Advantage:

### Flexible and Cost-Effective Cyber-Resiliency & Data Protection

Avoid vendor lock-in by choosing your preferred storage targets and reducing total cost of ownership with versatile deployment options tailored to your needs.

### Uncompromising Security and Privacy

CrashPlan's zero-trust architecture and zero-knowledge privacy principles ensure your data remains encrypted, protected, and exclusively accessible to your organization—both in transit and at rest.

### Comprehensive Threat Prevention and Compliance

From ransomware mitigation to regulatory adherence with HIPAA, GDPR, and more, CrashPlan provides robust tools to safeguard and manage critical data with confidence.

### Hassle-Free Legal Hold Management

Retain user data indefinitely with a simple configuration in the CrashPlan console, providing peace of mind for audits, investigations, and regulatory requirements.

### Seamless Management and Scalability

Control and optimize your backup operations across global locations from a single intuitive interface, ensuring data integrity, availability, and simplified compliance.

CrashPlan® provides cyber-ready data resilience and governance in a single platform for organizations whose ideas power their revenue. Trusted by entrepreneurs, professionals, and businesses of all sizes worldwide, CrashPlan's comprehensive backup and recovery solutions ensure the safety and compliance of data without disruption, anywhere at any time.
