CrashPlan™

CrashPlan Enterprise

Secure Your Data, Empower Your Business with CrashPlan Enterprise

Why CrashPlan:

👥 **>900k Users**

🖥 **>1.4M Devices**

📄 **>100B Files Recovered Annually**

🤝 **Trusted by over 50,000 Businesses**

CrashPlan Enterprise

CrashPlan Enterprise offers unmatched security for your endpoint data, shielding against losses due to disasters, mistakes, or ransomware attacks. Operating quietly and effectively in the background, it performs automatic backups of all files every fifteen minutes, eliminating the need for user intervention to adhere to backup policies. Recognized for its ease of use and effectiveness, CrashPlan provides top-tier unlimited endpoint backup and recovery solutions, directly enhancing your organization's data resilience with features like:

- ✓ **Device Migration**
- ✓ **Remote Workforce Data Loss Management**
- ✓ **Ransomware and Disaster Recovery**
- ✓ **Version Control and Data Archives**

Testimonials

"One of the hallmarks of this entire system has been and continues to be fantastic and detailed technical support, unparalleled by any other enterprise software we've utilized."
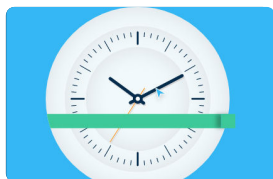

— **ADMINISTRATOR,**
   BIOMEDICAL ORGANIZATION RESEARCH

"If we have the computers and the backup in the same place, then what happens if they both get destroyed by a fire or another disaster?
You just can't put a dollar amount on the time we'd lose if we lost everything. And you can't put a dollar amount on peace of mind."

— **NICK SATOVICH,**
   OWNER, PEER PRESSURE CREATIVE

CrashPlan Enterprise secures your employees' digital innovations and ideas with superior endpoint backup solutions, protecting the critical data that drives your business forward.
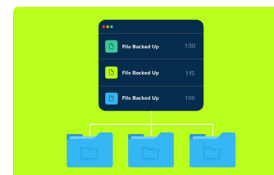

Complete, Continuous Backup

CrashPlan Enterprise offers enterprise IT teams an efficient backup solution with 15-minute incremental backups ensuring quick recovery from data loss due to hardware failures or disasters.

Unlimited Storage

With CrashPlan Enterprise, storage limitations are a thing of the past. Say goodbye to disputes caused by emptied recycle bins—we automatically safeguard every deleted file, allowing you to effortlessly restore any necessary document directly to the user's desktop.
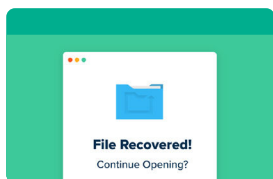

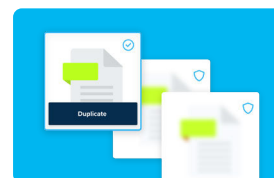

Legal Hold

When facing potential legal actions, the ability to quickly secure electronically stored information (ESI) is crucial. CrashPlan protects your organization from sanctions, fines, and adverse legal outcomes by ensuring critical data is preserved efficiently and effectively.

Data Retention Compliance

CrashPlan offers limitless version retention coupled with unlimited data retention capabilities for files removed from endpoints and enables your organization to satisfy even the most rigorous auditing requirements globally.
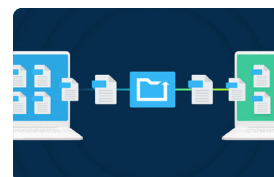

Ransomware and Disaster Recovery

CrashPlan ensures that even the most advanced ransomware threats cannot compromise your organization's data integrity. By equipping affected users with a new device, they can effortlessly revert their endpoint data to a clean state before the infection occurred.

Remote Employee Management and Device Migration

From welcoming new employees, saying goodbye to others, or transitioning between devices, these changes introduce risks to data integrity. CrashPlan offers a reliable safeguard for user-generated content and critical intellectual property during such transitions.
