Your data is more than just files — it's innovative ideas, groundbreaking research, and the key to your growth. As faculty and staff become more distributed and data increasingly decentralized, protecting it requires more than a traditional backup solution.

With secure, continuous backup and seamless recovery, CrashPlan keeps you moving forward without disruption — whether recovering from disasters, ransomware, user error, or other unexpected mishaps.

## Trusted by Thousands of Organizations and Institutions

Protect Your Data. Anytime. Anywhere.

“Every computer has to have CrashPlan on it, and the encryption has eased quite a few people’s minds.”

— GREG COLLINS, ASSOCIATE DIRECTOR OF CLIENT SERVICES AT WAKE FOREST UNIVERSITY

“I don’t need to worry about legal holds. CrashPlan does everything I need it to do.”

— JOE BAZELEY, CISO, WESLEYAN UNIVERSITY

“When a faculty member lost everything in the wildfires, CrashPlan enabled us to retrieve his data for him. It was perhaps one of the most validating moments for me as an IT leader.”

— HOWARD MILLER, UCLA ANDERSON SCHOOL OF MANAGEMENT

## Purpose-Built Backup for Every Workload

### CrashPlan for Endpoints

**Flexible, hassle-free protection.** Automatically secure data across faculty and staff devices — Mac, Windows, and Linux — with no user action required. With a wealth of options to choose from, including unlimited storage, bring-your-own storage, continuous backup, self-serve restore, and enhanced ransomware prevention and recovery, IT teams save time while ensuring endpoint data is always recoverable.

### CrashPlan for SaaS

**Enterprise-level backup for Microsoft 365.** Protect Exchange Online, SharePoint, OneDrive for Business, and Teams data from ransomware, accidental deletions, and compliance risks. With immutable storage, point-in-time restores, and cost-saving storage options — including OneDrive and Azure — you ensure your SaaS data is always recoverable.

### CrashPlan for Servers

**Comprehensive protection for critical infrastructure.** Recover quickly from outages, data corruption, or cyber incidents. With zero trust security and storage vendor-agnostic flexibility, you can build a cloud, hybrid, or fully on-premises solution that meets your data governance and security needs. CrashPlan for Servers fully protects Windows servers, including files, folders, the registry, event logs, and more.

### Point-in-Time Recovery

Roll back files and emails to a clean state after accidental deletion or corruption.

### Ransomware Protection

Restore data quickly without paying ransom.

### Legal Hold & eDiscovery

Secure and retain data to meet legal and compliance obligations.

### Regulatory Compliance

Help maintain defensible data retention policies for HIPAA, FERPA, FISMA, ITAR, NIST 800-53, NIST 800-171, CMMC, and more.

### Cost Optimization

Reduce storage costs by leveraging existing cloud storage investments.

# CrashPlan's Data Resilience Platform

# Data Resilience Features Designed for Educational Institutions

## Data Protection Without Disruption

- ✓ **Always-On Resilience** – Efficient, incremental backups that work silently in the background.
- ✓ **Cross-Platform Support** – Protect endpoints (Mac, Windows, Linux), SaaS apps, and servers in one solution.
- ✓ **Granular Restore Options** – Recover individual files, entire folders, or full system states to any point in time.

## Robust Security for Compliance & Control

- ✓ **Customer-Controlled Encryption Keys** – Protect data in transit and at rest with AES-256 encryption and TLS 1.2 ciphers.
- ✓ **Immutable Backups & Virtual Air Gap** – Ensure backup integrity with tamper-proof, unalterable data storage that protects against ransomware, insider threats, and accidental modifications.
- ✓ **Zero Trust Security Model** – Secure access with role-based permissions and multi-factor authentication.

## Efficiency and Flexibility for IT Teams

- ✓ **Self-Service Restore** – Empower users to restore lost files without IT intervention.
- ✓ **Scalable Deployment & Management** – Simple setup, intuitive administration, and automated policies streamline IT workload while ensuring comprehensive data protection.
- ✓ **Broad Storage Flexibility** – Store data in CrashPlan's cloud, Azure, AWS, OneDrive, on-premises, or a host of other options.

## Partnerships

**2.2M+ users**  
backing up

**300B+ files**  
protected annually

**1.4M+ devices**  
backing up

**Trusted by 7 of 8**  
Ivy League Universities

CrashPlan provides cyber-ready data resilience and governance in a single platform for organizations whose ideas power their growth. Trusted by businesses, universities, and institutions of all sizes worldwide, CrashPlan's comprehensive backup and recovery solutions ensure the safety and compliance of data without disruption, anywhere at any time.
